Product Description

2024 xiaomi su7 performance explosion xiaomi car su7 best price su7 xiaomi

Place of Origin	China
Product name	XIAOMI SU7
Body structure	SEDAN
Energy type	EV
Battery type	Lithium Iron Phosphate Battery
Fast Charging time	0.5 Hour Fast
Charging time	2
Max Speed	210km/h
Pure electric cruising range	700 KM

Xiaomi SU7 is a pure electric sedan launched by Xiaomi Auto, a subsidiary of Xiaomi Group, and is positioned as a C-class high-performance ecological technology sedan.

Its body size is 4997mm×1963mm×1455mm, with a wheelbase of 3000mm. It has a long range for the entire series, and the standard starting range is 700 kilometers under CLTC conditions. The car adopts a smooth curved body design, with a tension-filled front wheel package created by a 175° ripple surface, and a 1.36 times golden aspect ratio, making the front face of the whole car dynamic and elegant. In terms of details, the water drop-shaped headlights, the low wind resistance design of the whole car, and the various wheel designs complement the appearance of the whole car. The family-style halo taillights are composed of 360 super red LEDs to form a gradient dynamic light strip, and the dynamic lighting effect is elegant and eye-catching in the night traffic.

In addition, semi-hidden door handles, frameless water drop rearview mirrors, active liftable rear wing, active air intake grille and other designs not only bring smooth body lines, but also further reduce the drag coefficient of the whole vehicle, and improve the control and endurance. Xiaomi SU7 also provides 9 kinds of vitality colors such as Gulf Blue, Elegant Gray, Olive Green, Xiaguang Purple, Cambrian Gray, Meteor Blue, Lava Orange, Pearl White, Diamond Black, etc., condensing the beauty of nature.

In terms of the cockpit, Xiaomi SU7 has a spacious C-class cockpit space, and the ultra-long wheelbase of 3000mm brings ample head and leg space, providing a comfortable riding experience for both front and rear passengers. The driving position adopts a central axis symmetrical design, and the sitting posture, grip posture, and sight axis are aligned to reduce the wandering of eyes and ensure focused driving. The rich physical buttons on the center console facilitate blind operation and improve driving safety. The car also has a unique and versatile center console. The large-volume hollow design is convenient for placing large portable items. At the same time, it is equipped with a versatile base, storage compartments, hidden hooks, storage tables, glasses boxes, emergency flashlight storage, etc.

The rich storage space of the whole car reflects the storage ingenuity everywhere. In addition, the vehicle is equipped with a mobile phone placement position that supports wireless fast charging, a storage compartment on the front door panel, 2 umbrella storage slots, an extra-large glove box, an in-car smart refrigerator (4.6L), a storage slot for rear seat umbrellas, and double cup holders on the rear seats. The 25-speaker luxury audio system includes multiple high, medium and low-frequency speakers such as subwoofers and sky speakers. With the bass equalization algorithm and transient equalization algorithm, the speakers of the whole car bring a real, natural and balanced luxury audio experience. The car also offers 4 interior colors: Obsidian Black, Mist Purple, Twilight Red, and Galaxy Gray.
